GetValidTest - Valid test study guide, get certification

Exam : **C_TS411_2021**

Title : Certified Application Associate
- SAP S/4HANA R&D
Engineering

Vendor : SAP

Version : DEMO

NO.1 What do you have to keep in mind when working with value hierarchies?Note: There are 2 correct Answers to this question.

- A. Value nodes are values.
- B. Value nodes are not values.
- C. Only available for characteristics with CHAR or NUM format.
- D. Only available for characteristics with CHAR format.

Answer: B,D

NO.2 Where can you create routings?Note: There are 3 correct Answers to this question.

- A. In the classic transaction or corresponding Fiori app for the creation of routings (CA01)
- B. In the classic transaction or corresponding Fiori app for the Engineering Workbench (CEWB)
- C. In the classic transaction or corresponding Fiori app for Variant Configuration Modeling Environment (PMEVC)
- D. In Visual Manufacturing Planner
- E. In Product Structure Synchronization

Answer: A,B,D

NO.3 There are item categories that are only allowed in configurable BOMs.What do you have to keep in mind when working with configurable routings?Note: There are 3 correct Answers to this question.

- A. All types of operation can be used in non-configurable and configurable routings.
- B. Alternative sequences may only be used in configurable routings.
- C. All production resources/tools categories can be used in non-configurable and configurable routings.
- D. Equipment as production resources/tools may only be used in configurable routings.
- E. All sequence categories can be used in non-configurable and configurable routings.

Answer: A,B,D

NO.4 What is a clear indicator of having local object dependencies?

- A. Administrative data
- B. Name
- C. Status
- D. Syntax

Answer: C

NO.5 What is a class node?

- A. Special classes that are used as an operation in the routing.
- B. Special classes that are used as items in the BOM.
- C. Special classes that are used as nodes in class hierarchies.
- D. Special classes that enable a cross-class search.

Answer: B

NO.6 The value assignment interface for variant configuration can be structured using interface

design and characteristic groups. What can be used depending on the processing mode?

- A.** You can only use Interface Design for Processing Mode AVC and Characteristic Groups for Processing Mode Classic.
- B.** You can only use Interface Design for Processing Mode Classic and Characteristic Groups only for Processing Mode AVC.
- C.** You can use interface design for both processing modes, but characteristic groups only for Processing Mode AVC.
- D.** You can use interface design and characteristic groups for both processing modes.

Answer: B

NO.7 You use the app Find in Classes. The result screen only shows the object ID and type. What can you do to make characteristic values inside the result screen visible? Note: There are 2 correct Answers to this question.

- A.** Change the layout inside the class type.
- B.** Change the layout inside the result screen.
- C.** Change the layout inside an object.
- D.** Change the layout inside the class.

Answer: C,D

NO.8 You are working with VC Modeling Environment PMEVC. Complete object dependencies are created by drag & drop of one or more characteristic values into a BOM item. What can be created with this drag & drop functionality? Note: There are 2 correct Answers to this question.

- A.** Selection conditions only
- B.** Local and global object dependencies
- C.** Local object dependencies only
- D.** Selection conditions and procedures

Answer: B,D
